

AMBA-Cabells Journal Report

The **AMBA-Cabells Journal Report (ACJR)** is the result of collaboration between the **Association of MBAs** and **Business Graduates Association (AMBA & BGA)** and **Cabells Scholarly Analytics (Cabells)** to create a unique resource to support Chinese researchers in developing the quality of their publishing output. This report offers guidance on the most influential Chinese language Business and Management journals to aid institutions and authors in their decision-making about which journals would be the most suitable outlets for their publications. Using a combination of sophisticated citation analysis (including Google Scholar data) and expert peer review, the ACJR aims to support Chinese scholars and to help showcase the best business and management research being published in China.
